PERSONAL PROJECTS

Tic Tac Toe

Python/SQLite3

<https://github.com/s4sikdar/Tic-Tac-Toe-OOP-remote-repo>

- Programmed the game of Tic Tac Toe, both in single-player and multiplayer mode
- Created an Artificial Intelligence to play against in single-player mode by implementing the minimax algorithm
- Added a feature that allows users to register a username and keep track of the scores/results of all usernames in the form of a leaderboard, using the SQLite3 database management system

NBA Records Database

SQL/SQLite3

<https://github.com/s4sikdar/CS-338-Final-Project>

- Created an NBA records database using SQLite3, storing information of NBA teams over the last 10 years, team standings, individual team records, finals results, and records of key personnel within organizations
- Ensured Second Normal Form in all relations, along with Third Normal Form for most of them

T-Rex Run

HTML5, CSS3, JavaScript

https://github.com/s4sikdar/s4sikdar.github.io/tree/master/chrome_dino_run

- Created a version of the Google Chrome dinosaur game using HTML5, CSS3 and JavaScript
- Interacted with the Document Object Model and multiple layers of HTML5 Canvas elements to create a colored variant of the original game, with the help of the photoshop tool GIMP
- Used JavaScript's Web Workers to further enhance the user experience
- Game can be found here, open preferably in Microsoft Edge: [T-Rex Run](#)
